

Simba with Led Eyes for Cirque Voltaire Pinball

First I have to thank you for purchasing this Panther:-)

It's an easy mod, because no soldering is necessary, you have only to put the wires through a hole of the playfield to get the wires to the right place.

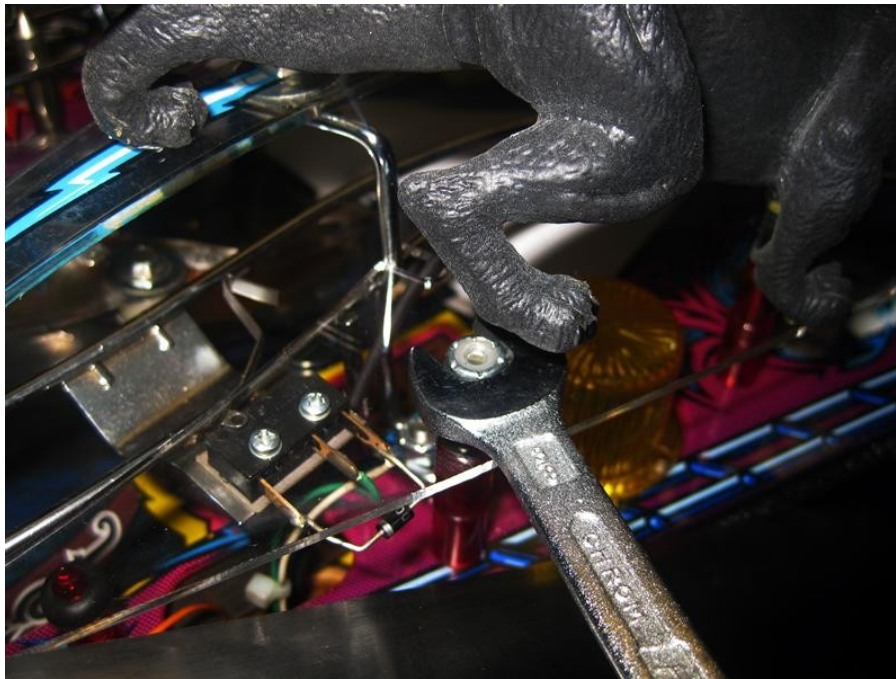

For installing you have to disconnect the alligator cable from the simba cable.

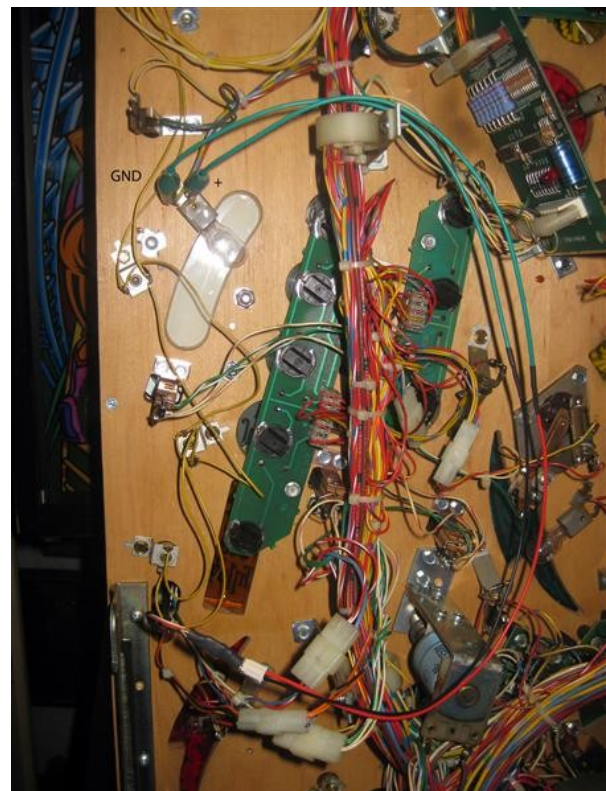

Remove the plastic and put the cable through the playfield

Put the third leg onto the plastic with the blue lightning and reconnect the plastic

After this turnout the playfield and connect the alligator re connect the alligators
If there is no light swap the alligators.

For me its a great mod and I hope you will enjoy it like me
