

## WOLFMAN Mod for Monsterbash

First I have to thank you for purchasing this WOLFMAN

It's an easy and reversible Mod. No soldering is necessary. You have only to put the wires through a hole and put two alligator connectors to a flasher at the backboard of MB.

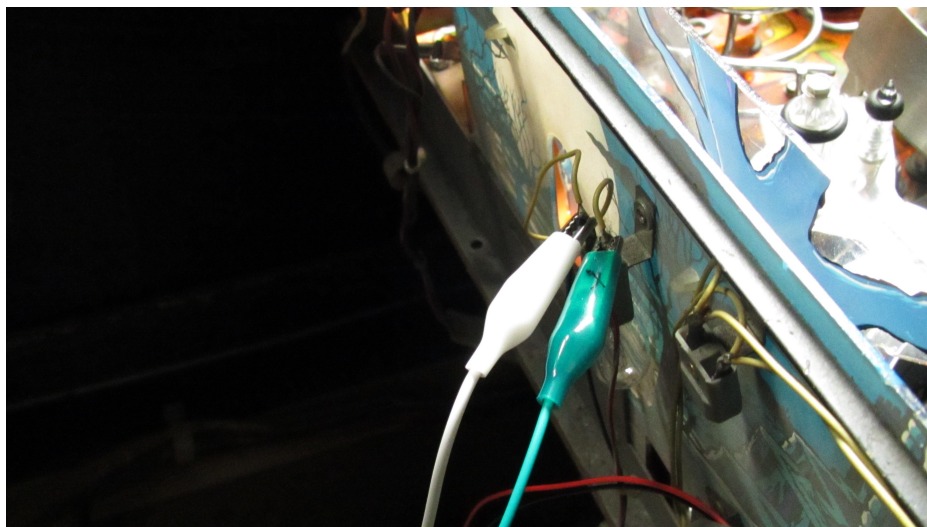

Remove the 3 screws of the plastic and put the wires through the hole like shown in the picture.

Put the wolfman like shown and rescrew it.

Connect the alligators to the flasher behind the backboard and you are ready to go :-)

For me its a great mod and I hope you will enjoy it like me
