REAL SPIDER mod for Monster Bash Pinball (15020)

First I have to thank you for purchasing this Mod.

It's an easy and reversible Mod. No soldering is necassary. You have only to put the wires through a hole and put two alligator connectors to a flasher under the playfield of MB.

Here you can see the pictures to add the Slingshot Spider plastic. We will show you only the right one. Left side is identical adding. Don't forget to remove the protective film at the plastic. Remove the Slingshotplastic and put the wire through the hole.

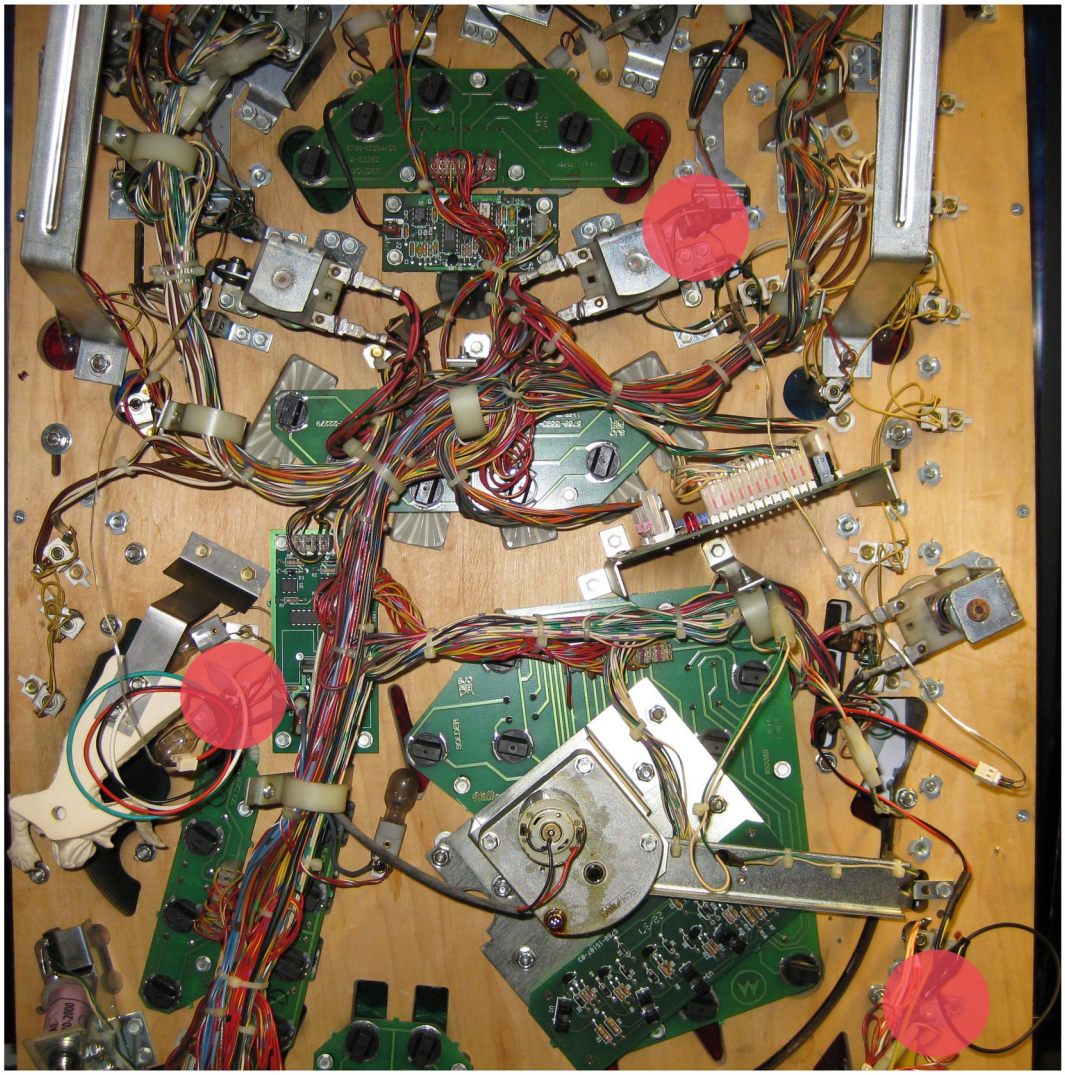

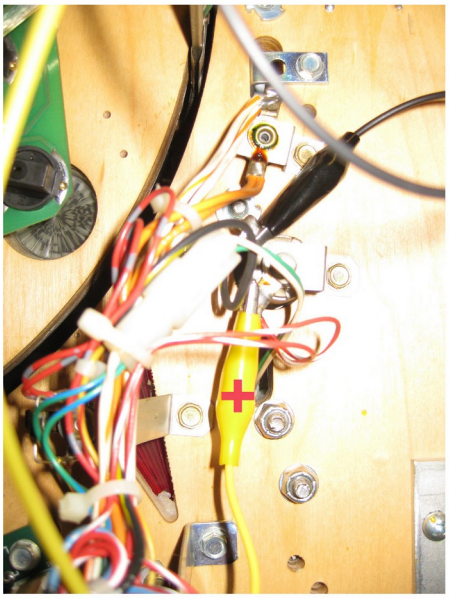

Here you can see where to connect the spider wires to the flasher lamps for the left and right slingshot

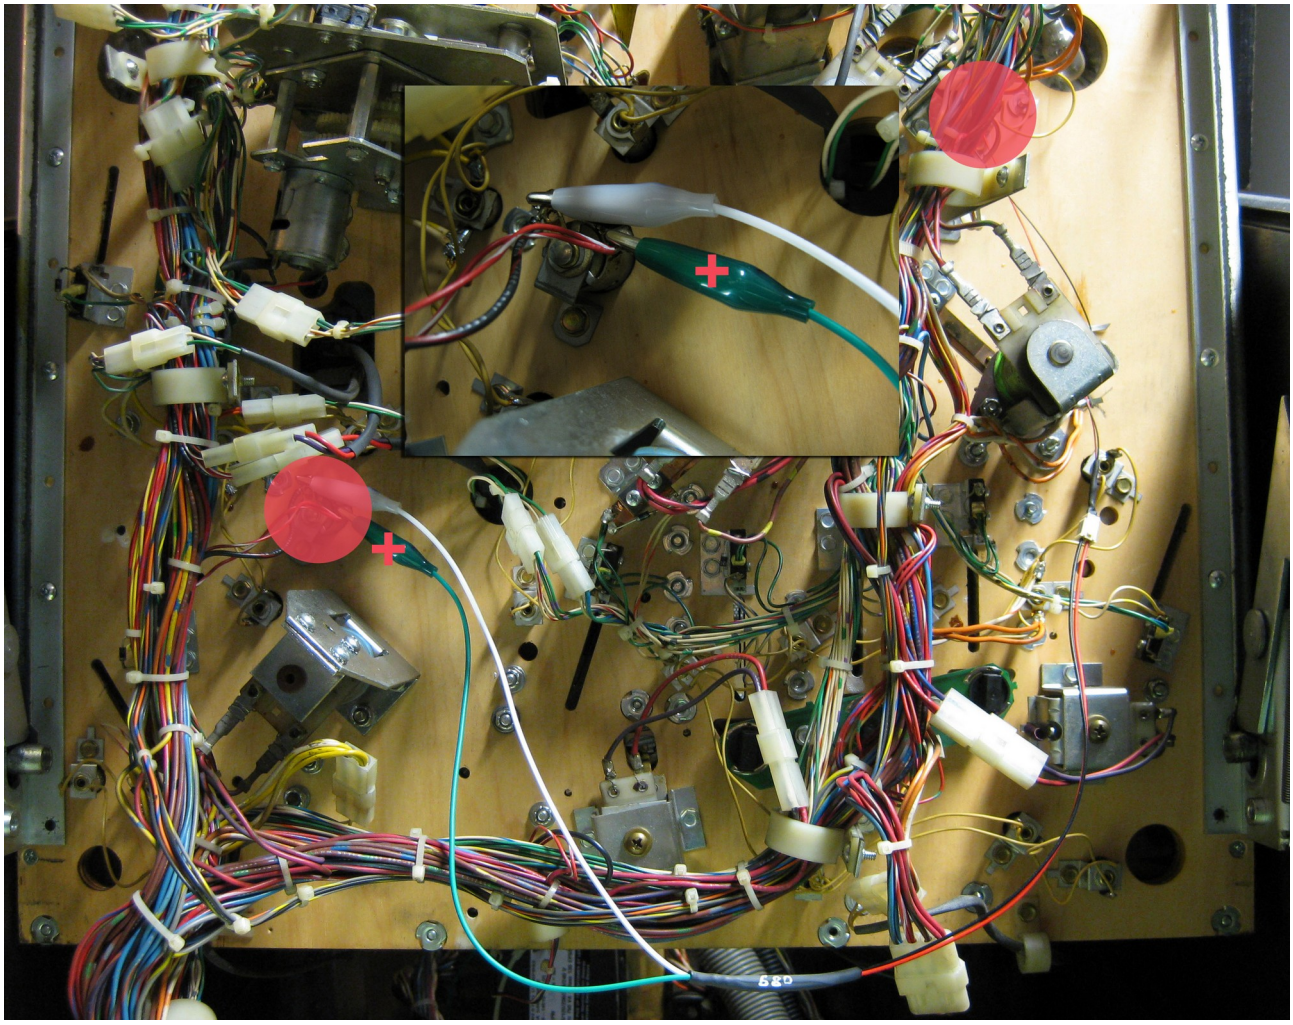

Look here for the 3rd spider

connect it to the flasher like shown on the following picture

You can either connect the alligator connectors to other Flasher lamps, if you want.

Have fun
